

DRESDEN
concept

6 JUNE 2018 // 5 – 8 PM

CHANGE THROUGH DIGITALISATION

Venue: HTW Dresden // Main Auditorium
(Entrance Friedrich List Platz 1)

CHANGE THROUGH DIGITALISATION

This **Scientific Area Network (SAN)** will focus on the impact of digitalisation on a variety of sectors as well as the interplay between society, culture and technology. Digital transformations strongly influence shifts towards a smarter way of living, learning, working or conducting research.

As part of the kick-off event, DRESDEN-concept would like to provide an overview of current research results and, subsequently, build up an interdisciplinary research network in Dresden. You are kindly invited to present your current results in a short lecture. Following this, there will be an opportunity to discuss these ideas and network with other participants. The event will be held in English.

ARE YOU A SCIENTIST OR AN EARLY-CAREER RESEARCHER

in the DRESDEN-concept Network? If so, and you wish to participate in an interdisciplinary exchange on the topic "Change Through Digitalisation" within the SAN, then please register here: <https://ddcchangethroughdigitalisation.eventbrite.de>

Please submit abstracts to:
katarzyna.wiesenhuetter@mailbox.tu-dresden.de
